N. space/emply (sqm)	38,6	46,8	52,0	55,8	46,2

Merchandise

- Market leader in soft lines with strong house brands / private labels, strong relationship with suppliers with contract manufacturing resulting in 'value for money' price points.
- Up to date fashion trend to ensure and attract strong customer following.
- Central buying for all soft lines and non food items. All food items are purchased and controlled regionally.
- Uniform one price policy for all products with the exception of variable pricing in locations with higher distribution cost and near monopoly trading conditions.

Highlights / Problems

- Continue softening of export sector in commodities has resulted in sizeable number of workers being laid-off.
- Pressure from underperforming Supermarket business with low yield, low margin, and high cost.
- Continuous expected cost pressure if minimum wage and electricity cost increases.

2016 Plans

- Increase consignment sales by providing more space and more brands, in order to achieve lower operating expenses, negative working capital and higher operating margin.
- Reinventing supermarket with SPAR for better efficiency, productivity and profitability.
- Continue store expansion policy by opening new one stop shopping stores and converting current supermarkets to SPAR format inline with current economic conditions.
